

# WDSA/CCWI 2026

## Call for Abstracts

May 18-22, 2026  
Paphos, Cyprus

### 4<sup>th</sup> International Joint Conference on Water Distribution Systems Analysis & Computing and Control in the Water Industry (WDSA/CCWI)

We are pleased to announce the 4th International Conference on Water Distribution Systems Analysis & Computing and Control in the Water Industry (WDSA/CCWI).

The conference provides an excellent opportunity to experience a high-quality technical program while enjoying Cypriot hospitality.

This year's conference is centered on the theme: "Designing the Next Generation of Urban Water and Wastewater Systems." Through its technical program, it will offer a unique opportunity for the academic and industrial communities to formulate new challenges, share solutions, and discuss future research directions in smart urban drinking and wastewater systems.

We invite you to submit your work at WDSA-CCWI2026. Authors with accepted abstracts will be eligible to submit a full paper to be published by a Scopus-indexed publisher with a DOI.

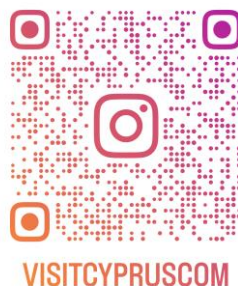

#### We are soliciting:

- Contributed/Invited Session Papers
- Invited Session Proposals

**A new "battle" competition will be organized, and the results will be announced during the conference.**

Venue: Aliathon Resort Paphos
